
Application versatility

Tour's development process created the product as an application solution capable of adapting to any architectural need. In the suspension version, the support cables are the same that power-supply the product and they come 5 metres long on the four dimensions. Lastly, thanks to the ceiling-mounted version and recess, Tour becomes a dynamic element provided with a clean design without interfering with the style it is made of.

The ring

Tour comes with an extruded aluminium profile which places it in a class of its own due to its almost imperceptible size. Due to its prestigious six finishes, Tour becomes a reasoned all-around element suitable for any architectural solution.

Emissions range

Tour comes with four different emissions: direct, indirect, internal lateral and dual-side emission. Four lighting effects that can be combined with each other in countless combinations to transform the environments with a minimal and contemporary light sign.

Harmonic diffusion

The opaline polycarbonate screen guarantees visual comfort and a perfect diffusion. Is easily removable thanks to a system equipped with a spring, patented and specially designed to perfectly adapt to the extruded element.
