

Optics design

The peculiar optical group conformation provides a lighting emission only on bollard front, eliminating every secondary light dispersion on the back. The light emission is deep, clear and defined.

6-mm thick extra-clear toughened glass with black silk-screen printing

TopLED and dedicated lenses in PMMA

Optical unit in anodised and coated die-cast aluminium

Polyester powder-coated extruded aluminium body with protective base coat

Control and performance

Luminous unit equipped with dedicated lens managing light distribution with maximum control. Asymmetric effects able to light up secondary roads, squares, parks and gardens.

Every needs answer

Wall mounted version, different dimensions and power bollards, single or double architectural poles and the arc peculiar version, ensures a solution for every installation needs. Peak provides easier installation also in the urban context, its great flexibility ensures a professional lighting and architecture project approach.
